Midway

Start of Ride

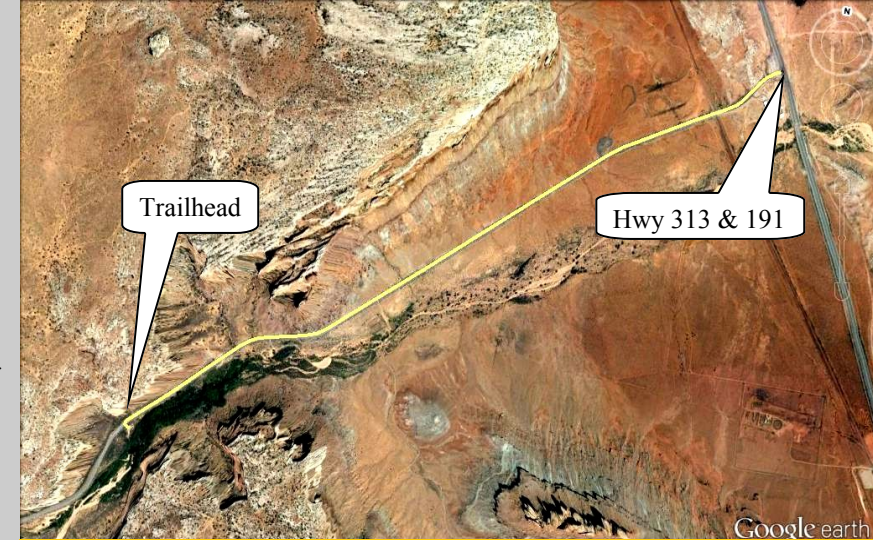

Ride #082

The "**Seven Mile Canyon**" ride is an easy 8.4 mile ride. The canyon starts off fairly wide and narrows as you get near the Grotto.

It is a beautiful ride especially during the Spring and Fall. Summer can be warm but there is some protection in the canyon.

Several Rock-Art drawings can be found in this canyon.

The **South Fork** is 8.2 miles round trip. The **North Fork** requires going thru a culvert on Hwy 313. There is about 7 miles of riding if you explore all of the North Fork.

Trailhead

Hwy 313 & 191
